

## Frame Australia.

Last month I mentioned Frame Australia was on in Melbourne. If you couldn't make it and want to see what you missed out on then a visit to this web site will give you access to the presentations.

[http://www.frameaustralia.com/Speakers/Morning\\_Session.aspx](http://www.frameaustralia.com/Speakers/Morning_Session.aspx)

Straight after this conference was a presentation put on by the Timber Development Association at the HIA in Canberra. It also covered engineered wood products and the architect for the new library at Docklands in Melbourne walked us through this building and why Cross Laminated Timber was chosen for the job. If you are involved in building construction or design you should be having a look at these technologies.

## What is our range of products and services?

The usual answer to this question is to recite our motto, "We do almost anything in timber!" Having done this I usually get asked, but do you do this and this and this?? So I thought it would be a good idea to give a brief overview of our business and what we do.

- ◆ Cabinet Timbers. We stock an extensive range of furniture quality boards from all around the world.
- ◆ Strip Flooring. Stopped counting at 550 combinations! We have flooring in solid T&G from thinner overlay products to traditional 19mm. Board widths range from 60mm to over 200mm.
- ◆ Parquetry. It's having a comeback and we offer a number of species in the block style.
- ◆ Engineered Flooring. Often called floating but it can be direct stuck in many instances too. Buyer beware with engineered flooring, there is rubbish on the market and no we don't offer laminate flooring. This group of products also includes Bamboo and we offer quite a few options here too.
- ◆ Decking. We offer a range of Aussie hardwoods,

- ◆ Cypress and DNA certified Merbau. Northern Box is also a good option for a non leaching specie. Boards from 65mm to 140mm and up to 32mm thick.
- ◆ Decking Screws. Why would you nail a deck down?
- ◆ Organoil. We do the full range of this fantastic natural product.
- ◆ Adhesives. For flooring we offer Soudal and Regupol. For cabinet work we do the Jowat range of polyurethanes and D4 PVA.
- ◆ Structural Timber. F11 through to F34. We keep a good range of durable F27 in stock and have access to all sorts of other structural products.
- ◆ Engineered beams. LVL, Hyspan, Gluelam. Whatever your requirements we will have some options.
- ◆ Cedar Mouldings. Through our partners Cedar Sales we offer an extensive range of cladding, lining and other innovative cedar products.
- ◆ Prime Pine. Not stocked but we have access to the full range in this product.
- ◆ Solid timber bench tops. All fabricated in our own workshop and made to order.
- ◆ Timber step treads. Made to measure, including non slip inserts and coating.
- ◆ Custom timber joinery. All manner of solid timber items fabricated to your specifications. Entry doors, tables, cabinets etc. Items can be supplied in component form or fully fabricated.
- ◆ Skirting, architraves, handrails and more. Standard mouldings and custom.
- ◆ Timber machining. We can do all the above so simple dressing is our bread and butter work.

We do a lot more than this list above but I wanted to keep it simple. I hope this gives you a good idea what we are about.

## New Stock.

New stocks of flooring glue have arrived and a number of Aussie hardwoods such as Blackbutt, Jarrah and Spotted Gum all looking healthy. With a couple of big jobs on the go our Ash stocks have also been well topped up. As always, whatever you need, just call us.

*Regards Shaun*
